## 2. Qoom

The goal of the project is to create an application for doctors. Qoom has many modules like document, checklist, list, task, QM-manual, training etc .

Qoom is responsive, light weight, efficient in performance and data processing and testable.

By this Application Doctors can create their Documents ,Set up Internal Trainings .Save Patient Case Data , Checklists etc.

### **Tools and Technology Used:**

- For Automation Testing: Selenium Web driver, POM, Maven, TestNG.
- For Cross Browser Testing: BrowserStack. Also, We did Automation using Browserstack.
- For Performance Testing: JMeter
- For Defect Tracking: JIRA
- For API Testing : Postman

### **Responsibilities:**

- Understanding the client Requirements and projects Functionalities.
- Prepare and Execution of test cases as per requirement.
- Involved in Manual as well as Automation testing (Selenium Web drivers)
- Designing the framework
- Creating and Execution of Regression and smoke Test cases using Selenium Web driver and Java
- Writing test cases for Project
- Involved in Performance testing
- Preparing Defect Report.
- Mapping requirements with test cases.
- Retesting the cases where defects have been raised.

## 3. MOP

MOP Web Portal for hospital data management such as Patient details , Order history , Clinical Data . Treatment suggestions , patient background details . Orders , Appointments . Dentists details , hygienists details.

### **Tools and Technology Used:**

- For Automation Testing: Selenium Web driver, POM, Maven, Selenium Cucumber , Testng.
- For Cross Browser Testing: BrowserStack. Also, We did Automation using Browserstack.
- For Performance Testing: JMeter
- For Defect Tracking: JIRA
- For API Testing : Postman

### **Responsibilities:**

- Understanding the client Requirements and projects Functionalities.
- Prepare and Execution of test cases as per requirement.
- Involved in Manual as well as Automation testing (Selenium Web drivers)
- Designing the framework
- Creating and Execution of Regression and smoke Test cases using Selenium Web driver and Java
- Writing test cases for Project

- Involved in Performance testing
- Preparing Defect Report.
- Mapping requirements with test cases.
- Retesting the cases where defects have been raised.

12/2016 – 03/2018

**Organization Name : Webnords Solutions. Narhe**

**Position : Software Test Engineer**

**Project:**

**1. Smart NarayanGaon**

The Smart Narayangaon is a Web application and mobile application that covers each and every facility available in Narayangaon. It is an interactive platform for integrating all related entities and processes to increase efficiency, reduce costs, and improve management and administration.

**Tools and Technology Used:**

- For Automation Testing: Selenium Web driver, Junit.Keyword Driven Framework
- Manual Testing For 2 Modules.

**Responsibilities:**

- Involved in Manual Testing.
- Studied the requirements documents to understand Project.
- Understand testing requirements by studying Test strategy.
- Involved in Test cases documents review along with Test lead.
- Executed test cases on Software build and prepared test log with daily results.
- Reported defects and involved in Defect tracking process.
