PROJECTS:

1. Project Title - Fitzmark(Web Application)

Testing Technologies used: Manual +Automation testing(Cucumber Selenium)
Role: As a tester involved in writing features files and execute them with Selenium cucumber .
Involved in generating report and file bugs in Azure.

Description:Logistics Domain Project
 Is the part of supply chain management and supply chain engineering that plans, implements, and controls the efficient, effective forward, and reverse flow and storage of goods, services, and related information between the point of origin and point of consumption to meet customer's Requirements.

1. Project Title – Hands On (Web Application + Android/iOS application)

Testing Technologies used: Manual +Automation testing(Selenium+Cucumber)

Role: As a tester involved in developing of test plan, writing test cases and execute them with Selenium. Involved in generating TestNG report and file bugs in JIRA.

Description: Hands On uses the latest in technology to aid employers and employees in connecting to discover the perfect job match. We incorporate multiple features that make this matching process simple and effective, and vacancies can be filled by qualified workers quickly and easily, in less than a day or as we like to put it NOW! You'll only get so far with recruitment or temp staffing agencies before hitting the wall. Hands On allows purposeful connection between contingent workforce and the employers who need people capable of competently completing the tasks at hand.

2. Project Title – iAbiri (Web Application/Mobile Application)

Testing Technologies used: Manual Testing

Role: As a tester involved in writing test cases, generate defect report and fill bugs in Taiga.

Description: iabiri is a software app developed to make an impact to the transport sector by majorly targeting the traveler.

It works as an alternative transport solution that offers the traveler access to high quality bus rides, fixed lines, timings and Fares all in one app.

Iabiri is easy

- Enter the pickup and drop off points

- Pick up the most convenient route and travelling

- Book your ride and save on time and money

It also offers you a combined comfort, quality, safe travel and high responsive customer service.

3. **Project Title - Connect us**

   Testing Technologies used: Manual

   Role: As a tester involved in writing test cases and filling bugs in Jira.

   Description: Connect us web application developed for the internal communication and for customer support. If end user faces any issue while using any in-house application, then ticket is raised in the connect us and assigned to respective person in respective department. Status regarding this ticket is updated in connect us and end user can communicate directly via comments. Customer support team can change the status of the incident and once completed can close it. Once completed the reporter person gets the notification and check the whether the issue is resolved or not.
